How to access electronic resources

1. Log into the student portal at https://portal.gre.ac.uk using your usual computer login and password combination.

2. Select the Library & IT tab.

3. Click on the Databases, Journals and e-books link in the e-Library channel.
4. Find the database you want to access from the alphabetical list.

5. Selecting an individual database will take you directly into that resource without the need to enter any further usernames/passwords.

You should use this route to find and gain access to all electronic databases containing full-text electronic journals and books. You cannot login directly to the database as full access requires a login via our proxy server.
